

Providence Stroke Center

The first primary stroke center in Oregon, Providence Stroke Center cares for more stroke patients than any other provider in the state, and is a leader in comprehensive, state-of-the-art stroke care, education and research. Our 24-hour on-call team of neurologists, neurosurgeons, neurointerventionalists, radiologists, emergency physicians, nurses and therapists are ready to serve your patients every day of the year at Providence St. Vincent and Providence Portland medical centers. Both facilities are multiple-year winners of the American Stroke Association's gold performance award for sustained excellence.

At Providence Stroke Center, this multidisciplinary team guides each patient's care, from rapid diagnosis through state-of-the-art treatment, rehabilitation and support. Our comprehensive services include the most technologically advanced methods to remove clots, repair broken arteries and restore blood flow to the brain.

Providence Stroke Center is now extending clinical services to hospitals across Oregon via Providence Telestroke Network. Through a secure two-way video system, Providence Stroke Center neurologists can be "in the room" with patients, family members and emergency physicians miles from Portland, helping to determine the best treatment.

Services

- MERCI clot-retrieval system and other procedures to remove or destroy blood clots using a minimally invasive approach
- High-quality recovery care in dedicated stroke units
- Expert inpatient rehabilitation services, including physical, occupational and speech therapy, as well as home and outpatient therapy
