

A composite image showing a cross-section of a brain with a colorful, multi-layered scan overlay. The scan uses a spectrum of colors from purple and blue to yellow and orange, highlighting different tissue densities or functional areas. The background is a dark teal color.

Providence Brain Institute

Providence Brain Institute is a comprehensive, integrated center of excellence that treats all conditions of the brain and spine. Here, physicians and surgeons from a variety of disciplines work with referring physicians to design treatment and rehabilitation plans focused on each patient's needs.

Among our physicians are fellowship-trained specialists, leading researchers and experts in the latest minimally invasive surgical techniques. Providence Brain Institute equips these physicians with the latest technologies, including:

- iMRI, the world's most advanced intraoperative neurosurgical imaging system
- Gamma Knife Perfexion
- The most advanced neuro-biplane catheterization lab in the region
- Providence Telestroke Network, providing 24-hour stroke expertise to hospitals across the state through a two-way video system

Available on our Web site at www.providence.org/physicianinfo:

- **Physician directory:** Get contact information for all Providence Brain Institute physicians.
- **eNeuro:** Subscribe to our quarterly online physician newsletter.
- **Clinical trials:** Learn about current clinical trials available to your patients through Providence. (This information also is available in each issue of eNeuro.)
- **Speakers' bureau:** Connect with Providence Brain Institute physicians who are available to speak on a variety of topics related to neurological conditions.
- **EventCasts:** View live or archived medical grand rounds, meetings, lectures, CME activities and other events broadcast by Providence Brain Institute.
